

IntelePeer Provides Near-Real Time Provisioning for Cisco Spark Call via its new API

ORLANDO, FL – March 8, 2016 – [IntelePeer](#), the Cloud Communications Company, today announced that it is delivering Cisco resellers the ability to offer near real-time provisioning of voice, contracting and billing for Cisco Spark's call capabilities. As a certified Cisco Preferred Media Partner (PMP), IntelePeer has developed a new communications Application Programming Interface (API) that enables near real-time provisioning of its voice services for Cisco Spark. IntelePeer's CoreCloud™ SIP service provides resellers a high quality reliable voice service to enable Cisco Spark's call capabilities.

“Our strategic work with Cisco to develop the API that makes this possible validates the future direction of the UC and collaboration market,” said Matt Edic, Chief eXperience Officer, IntelePeer. “With the new enterprise-grade API integrated into Cisco Spark, our voice services from the cloud can be installed and active within minutes versus days. The API enabled automation helps companies to immediately realize the benefits of business collaboration.”

Building upon its existing relationship as a Cisco Solutions Partner, IntelePeer has earned certification as a Cisco PMP. The designation as a PMP in the Cisco partner ecosystem, certifies that IntelePeer's voice/fax services integrate seamlessly with Spark Call. The combined solution has the ability to reduce costs and streamline telecom operations.

“The ability to make voice calls is an important piece of Cisco Spark. And with IntelePeer's API and PSTN services support, our customers will be able to further realize the benefits of a single collaboration experience that spans all modes of communication,” said Andy Dignan, Senior Director of Worldwide Sales and Go-To-Market Strategy for Cisco's Collaboration group. “IntelePeer's high quality, scalable and reliable service enables an automated and outstanding user experience and seamless transition to Cisco Spark.”

Together, the combination of Cisco and IntelePeer's services cost-effectively deliver cloud-based communications services. Cisco Spark backed by IntelePeer is available today to Cisco resellers and systems integrators through the Preferred Media Provider Portal.
